V03-002 MTR0016 Mike Rhodes 29-Oct-1982  
Add PAT\$GW\_IMGTYP word. This word describes the type  
of image (normal, cli, compatibility, etc.) to the  
image activator. It is located in the last word of  
the first VBN of the image.

V03-001 MTR0012 Mike Rhodes 16-Aug-1982  
Modify file names to remove duplicate file name usage  
between code and require files.

V02-020 MTR0001 Mike Rhodes 20-Aug-1981  
Add global descriptor for allowing LBR\$OUTPUT\_HELP  
to access the remainder of the command line without  
intervention from PATCH's parser.  
The symbol is PAT\$GL\_HELP\_LIN.

V02-019 BLS0043 Benn Schreiber 10-Apr-1981  
Add XABFHC for input file

V02-018 PCG0001 Peter George 02-FEB-1981  
Add require statement for LIB\$:PATDEF.REQ
